

# Land Analyst

MACPHAIL SCHOOL OF ENERGY

## Overview

Forge your path in the oil and gas sector with the Land Analyst certificate, an online program designed to provide you with the essential skills and knowledge needed to manage and coordinate land administration tasks effectively.

This ten-course program is tailored for those looking to make an impact by bridging the gap between corporations, landowners, regulatory bodies and government entities.

Your learning journey covers all aspects of surface land administration. The curriculum is crafted to give you direct knowledge and experience, enabling you to apply learned concepts directly to real-world scenarios.

In this program, you will:

- master land administration concepts and practices
- gain proficiency in liaising between various stakeholders in the oil and gas industry
- learn how to manage and maintain accurate land and lease records
- gain expertise in coordinating data and projects and ensuring regulatory and environmental compliance
- develop competence in managing relationships within communities affected by energy projects
- grasp the evolving landscape of renewable energy and its impact on land administration.

Coordination and liaison roles are essential for the smooth operation of land management activities. Develop the competencies to manage land records, negotiate leases and ensure regulatory compliance.

Open the door to many career opportunities across sectors, including energy, utilities, environmental, and transportation. Prepare for roles such as land and records administrator, surface land coordinator, project analyst, community relations representative, lease records analyst, renewable energy land administrator and more.

## Flexible online learning

Our online courses offer you the flexibility to balance your studies with work and other personal commitments. However, you are still expected to engage regularly with your instructor and meet required milestones at a pace that ensures each course is completed within set timelines.

Connect with peers and professionals through online forums, group projects and collaborative learning opportunities.

If you are a professional seeking to enter or advance in the land management sector of the oil and gas industry and looking for a comprehensive, flexible online program that fits your schedule, this program is for you.

## Traits, skills and aptitudes

As a land analyst, you need:

- integrity and high ethical standards
- written and verbal communication skills
- interpersonal, negotiation and public relations skills
- analytical, time-management and problem-solving skills
- organizational skills and attention to detail
- patience
- ability to work with little supervision
- computer skills
- leadership skills to interact with all functions and levels of management
- the ability to make decisions according to multiple, changing priorities under tight deadlines.

You should enjoy having clear rules and organized methods to guide your activities, dealing with legal matters and working with

people from all walks of life.

## Credentials

After successfully completing this program, you'll receive a SAIT Land Analyst certificate.

## Practicum, Co-op and Work Integrated Learning

During your second semester, you'll have the option to:

- complete an eight-week practicum with an employer, or
- complete a group project to refine your project management skills, including the planning and management of project scope, time, cost, quality, human resources, communication, risk and procurement.

## Admission requirements

### Applicants educated in Canada

Applicants must demonstrate [English language proficiency](#) and completion of the following courses or equivalents:

- 50% or better in English Language Arts 30-1 or 30-2, and
