

Next Steps After Telephone Consultation

Next Steps After Phone Consultation

After the clinic Nurse completes the review of immunizations, if additional vaccines are required then future appointments will be discussed at the time of your initial telephone consultation.

1. Blood work or X-rays

If blood work, or x-rays, are required before immunizations may be administered, then the student is asked to confirm their preferred email address with the SAIT Health clinic who will then email the requisition directly to the student.

Students are responsible for booking lab appointments and completing requisite blood work. Lab work is covered under provincial health care programs; so even if you have out-of-province health care, you may go to the lab for no charge and get your levels tested.

The lab results will be sent back to SAIT Health Services Clinic automatically either electronically, or by fax.

2. Boosters

After lab results are received, the SAIT Health Services Clinic will book immunization appointments in alignment with program requirements (if required). Depending on your antibody levels, you may not need to get booster doses of some vaccines. Fees will apply to future immunization appointments as per the fees listed above.

If the student is residing outside of the Calgary Health Zone, then the student will be notified of the immunizations that are still required, and then the student may begin the process wherever is most convenient for the student if desired. Once classes start in September, The SAIT Health Services Clinic will take over and administer (by appointment only), any incomplete required immunizations for the student's program. Fees will apply to any appointment where vaccines are administered as per the fee schedule above.

3. Submit Documentation

If the student begins the immunization process outside of the SAIT Health Services Clinic, then the student and the student's healthcare professional must fill out and return the "[Vaccine List for Administration Outside of SAIT Clinic](#)" form to the SAIT Health Clinic using one of the following methods:

- fax 1.403.284.8531 (preferred method),
OR
- email health.services@sait.ca (not advised as it is not secure).

4. Book Follow-up Appointments

Next Steps After Telephone Consultation

The SAIT Health Services Clinic will book follow-up appointments for a time that works around your class schedule. The SAIT Health Services Clinic will directly communicate with the School of Health and Public Safety when you have completed the process, so that you do not have to organize your records yourself.

5. Obtain documentation for submission to *Verified by Synergy Gateway*.

Once all of your immunizations have been completed, the SAIT Health Clinic will provide the student with a validation form that indicates that the student has completed all of the program immunization requirements.

6. Submit documentation form to *Verified by Synergy Gateway*

Students will log into their Verified by Synergy Gateway student profile and upload their immunization documentation for validation.
